

Make Your Brokers & LOs the Superheroes

With Prudent AI, they can automatically validate documents, flag risks, and evaluate borrowers at intake, instead of waiting days for income teams to review documents.

Do These Problems Feel Familiar?

- ❗ Brokers/LOs submit bank statements, but income still needs internal validation
- ❗ Ops teams spend hours rechecking broker assumptions
- ❗ Files stall before underwriting even begins
- ❗ Borrowers wait days, sometimes even weeks for basic income answers

Then, Experience Income Certainty at Intake

Prudent AI enables lenders to push income validation upstream — directly into the broker and correspondent workflow.

Instead of spreadsheets, emails, and rework:

- ✓ Brokers/LOs upload documents themselves
- ✓ Income is calculated instantly and consistently
- ✓ Risks and inconsistencies are flagged upfront
- ✓ Lenders receive review-ready, defensible outputs

Prudent AI's Bank Statement Analyzer automates income analysis from bank statements—turning a process that once took hours into something that takes minutes.

Instead of combing through line items, your teams get:

- ✓ Clear visibility into qualifying income
- ✓ Consistent, standardized calculations
- ✓ Outputs that are easy to review, explain, and trust

All without changing how your teams work.

How It Works

-  Upload 12–24 months of bank statements
-  Prudent AI automatically extracts deposits
-  Flags fraud and inconsistent files
-  Monthly income is calculated and summarized
-  Teams receive clean, investor-ready outputs
