

Bank Statement Analyzer: Buying Committee

Power Users / Influencers

ICP Role	Core Responsibilities	Pain Points (Today)	Current Alternatives /	How Prudent AI Helps
Income desk (Power users/Influencers)	Prepare income summaries before underwriting; support AEs	• High processing volume • Dependency on senior staff • Slow turnaround at intake	• Excel templates • Ad-hoc internal tools • Rework after underwriting feedback	• Self-serve income analysis • Standardized outputs • Faster turnaround with fewer touches
Processors/Ops (Users/Influencers)	Ensure complete, clean submissions	• Missing months/pages • Wrong formats or scans • High rework rates	• Manual checklist reviews • Visual inspection of PDFs	• Automated completeness checks • Clean summaries • Fewer downstream conditions

Key Influencers

ICP Role	Core Responsibilities	Pain Points (Today)	Current Alternatives /	How Prudent AI Helps
Pre-underwriting & underwriting <i>(Key Influencers)</i>	Assess income accuracy, detect risk, ensure decisions are defensible for approval and investors	• Manual review of thousands of transactions • Hidden risks (BNPL, undisclosed debt) missed • Inconsistent interpretations across underwriters • Late discovery of risk causing rework	• Line-by-line manual review • Spreadsheet-based income models • Reliance on senior judgment	• Automated qualified income in minutes • Built-in fraud & cash-flow risk flags • Transparent categorization + audit trail • Repeatable, defensible outputs
Risk & Compliance Teams <i>(Influencers & Gatekeepers)</i>	Ensure decisions are compliant and auditable	• Lack of audit trail • Hard to justify overrides • Investor and post-close exposure	• Manual documentation • Emails and notes • Static spreadsheets	• Full change history • Transparent QI evolution • Investor-ready reports
Account Executives (AEs) <i>(Champions & Internal Sellers)</i>	Manage broker relationships and pipeline flow	• Files kicked back due to income issues • Poor visibility into income problems • Broker frustration	• Chasing income desks • Late clarification requests • Waiting on underwriting	• Income clarity upfront • Clear flags and explanations • Faster broker responses

Key Decision Makers

ICP Role	Core Responsibilities	Pain Points (Today)	Current Alternatives /	How Prudent AI Helps
Head of Underwriting / Credit <i>(Decision Maker)</i>	Own income policy, risk tolerance, consistency	• Variability across underwriters • Bottlenecks around income review • Scaling without quality loss	• More senior reviews • Training-heavy processes	• Standardized, auditable income logic • Faster decisions without quality trade-offs
Sales Head <i>(Co-decision maker)</i>	Drive loan volume, reduce fallout, improve broker experience	• Deals stall due to income issues discovered late • Brokers frustrated with rework • Poor visibility into why files get kicked back	• Waiting on Income desk/Underwriting • Asking brokers for clarifications late • Managing fallouts reactively	• Income clarity upfront • Faster answers to brokers • Fewer income-related rejections • Improved pull-through and broker trust
Lending Operations Leadership <i>(Co-decision maker)</i>	Control cost, scale volume, improve efficiency	• Costs scale linearly with volume • Income review bottlenecks • Inconsistent throughput	• Hiring more analysts • Manual QA layers	• 4× productivity gains • Scale without headcount • Consistent throughput

Final Economic Buyers

ICP Role	Core Responsibilities	Pain Points (Today)	Current Alternatives /	How Prudent AI Helps
Mortgage Lender / Exec Leadership (CRO, COO) <i>(Final economic buyer)</i>	Balance growth, risk, and investor confidence	• Income fraud risk • Late-stage fallout • Investor scrutiny	• Post-close audits • Disconnected tools	• Income + fraud + risk in one system • Earlier risk visibility • Cleaner loans reaching underwriting
