

Why Wait for Underwriting?

Catch fraud at intake. Before it costs you.

Prudent AI analyzes every bank statement for document manipulation, financial inconsistencies, and tampered data — automatically, right after you upload documents.

The Pre-emptive Checks that save you time & money

- Balance Computation**
 Opening + Deposits – Withdrawals = Ending Balance verified per bank statement
- Rollover Continuity**
 Prior month ending balance must equal current month opening balance
- Font & Text Anomalies**
 Detects and highlights edits to amounts, dates, or formatting using the bank specific configurations we maintain
- Deposit Transaction Match**
 Statement deposit totals validated against individual transaction entries
- %EOF / PDF Regeneration**
 Flags PDFs recreated through editing software and sends critical alerts
- Bank Domain & Symbol Validation**
 Cross-references bank-specific formatting to surface suspicious deviations

Risk Scoring — Every File Gets Rated

- Critical** — Immediate flag. Do not advance.
- High** — Requires senior review
- Medium** — Follow up on specific item
- Low** — Minor data gap noted
- No Risk** — File is clean. Move forward.

What This Means for Your Team

- Stop bad loans before they enter the pipeline** — Not after underwriting has already spent hours on them.
- Replace manual reconciliation entirely** — No more hand-verifying balances, deposit totals, or rollover continuity.
- Reduce repurchase and compliance exposure** — Early detection protects your institution downstream.
- Catch fraudulent files at intake** — so your team stops spending **\$1,500–\$2,500** in processing costs on loans that should never have moved forward

How Prudent AI Compares

Capability	Prudent AI	Ocrolus	Laminr AI
Fraud detection built into core analysis	✓	—	—
Mathematical balance reconciliation	✓	Partial	—
Bank-specific formatting intelligence	✓	—	—
Structured 5-level risk scoring	✓	—	—
Fraud risk vs. data gap separation	✓	—	—
Detection at intake (not post-extraction)	✓	—	—

Protect your pipeline from the first document. www.prudent.ai · Bank Statement Analyzer

Other vendors promise AI; Prudent AI actually delivers it at enterprise scale. We don't just use Prudent AI—we rely on it.
