

Income analysis is handled. *The first mile isn't.*

Bank Statement Analyzer already gives your income desk clean, consistent output. But the files feeding it — incomplete submissions, missing months, unverified uploads — are still slowing everything down. Self-Serve Broker Portal fixes the problem before it ever reaches your team.

THE GAP

The analysis is fast. Getting clean input there isn't.

Bank Statement Analyzer performs best with complete, accurate bank statements. Right now, your team is spending time fixing what brokers should have caught at upload.

⚠ Brokers submit incomplete or inconsistent statements — your ops team chases down the missing months

⚠ Files stall before underwriting begins — borrowers wait days for income answers that could take minutes

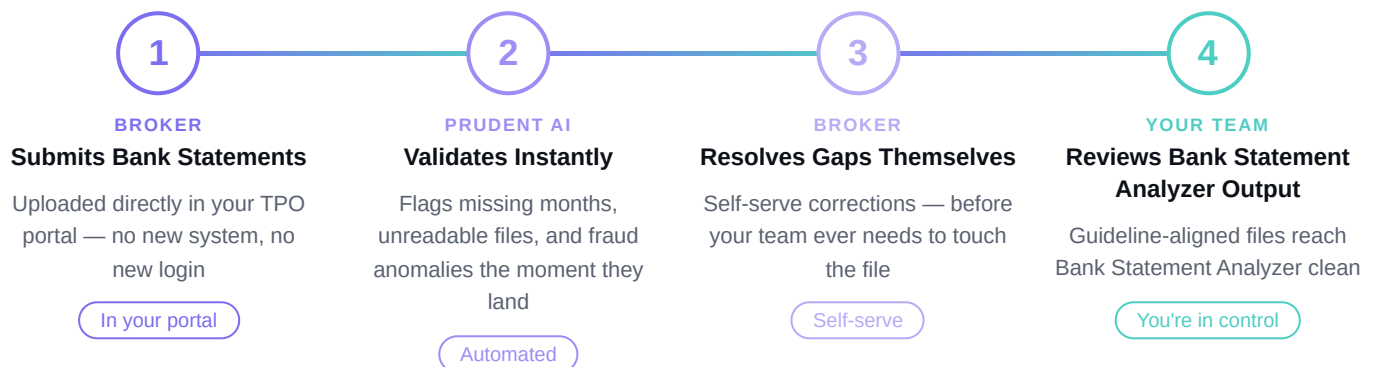

⚠ Income desk time is burned rechecking broker assumptions before analysis can run

⚠ Fraud and anomalies surface late — when they're expensive and disruptive to address

HOW IT WORKS

Four steps. Clean files. Your team stays in control.

Brokers own the first mile. Prudent AI handles validation. Your income desk handles decisions — with Bank Statement Analyzer doing the analysis it was built for.

WHO BENEFITS

Brokers move faster. Your team reviews less noise.

Brokers get independence without workarounds. Your income desk gets files worth reviewing.

FOR YOUR BROKERS

Fewer delays. More closed loans.

- ✓ Know exactly what's missing at the moment of upload
- ✓ Fix and resubmit without waiting on your ops team
- ✓ Track submission status and milestones in real time
- ✓ Deliver borrower income answers in minutes, not days

FOR YOUR TEAM

Clean input. Fewer exceptions.

- ✓ Income desk receives validated files — not raw broker submissions
- ✓ Fraud and anomalies caught before they reach your scenario desk
- ✓ Income eligibility decisions stay with you — we handle the prep
- ✓ 2× loan throughput without adding headcount

60%

reduction in
intake cycle time

90%

missing files resolved
before team review

2×

loan throughput
same team size

99%

anomaly detection
accuracy

SETUP

No rip-and-replace. No new system to learn. Plugs into your existing TPO portal and LOS in days.

Embedded Widget

Fits into your existing TPO portal and LOS — Encompass and other systems supported

Mirrors Your Guidelines

Configured to your investor guidelines and loan programs — not a one-size setup

Live in Days

Standard integration in 2–3 days. No lengthy implementation cycles
