

Brokers and LOs get instant clarity in a loan file.

Once brokers and LOs upload docs through the self-serve portal, Prudent AI calculates qualifying income, identifies gaps, and sends real-time alerts. All happens within your existing TPO portal.

HOW IT WORKS

From upload to underwriting-ready in minutes

Broker or LO uploads income docs

Self-serve portal accepts any doc type — W-2s, bank statements, 1099s, P&Ls. No ops ticket required.

Real-time income calculation and eligibility verification

Qualifying income runs in real time. No AE loop, no waiting on the ops team to turn around a review.

Instant alerts on gaps, conditions, and missing docs

Brokers and LOs see exactly what's missing while the file is still being put together, instead of after underwriting sends it back.

UPFRONT INCOME

Calculates qualifying income without operations team dependency the moment any doc type is uploaded — across agency and Non-QM programs.

UPFRONT AUS

Runs Non-QM loan files against your investor guidelines automatically — evaluating eligibility, conditions, and flags before the file reaches the underwriting desk. No manual AUS lookup for the LO or broker.

AGENCY & NON-AGENCY

- **Agency** — Fannie Mae, Freddie Mac, FHA, VA, USDA
Income calculated against agency guidelines. Fannie Mae TSP-authorized workflow.

- **Non-Agency** Bank statement, DSCR, asset depletion, P&L programs — evaluated against your investor guidelines.

Sits in your existing workflow — no rip-and-replace. Connects to your current LOS and POS.

Output: Verified, income-qualified file delivered to your LOS

WHAT YOU GET

Loan files move in hours instead of days.

LO answers the borrower same day. Underwriter clears the queue same shift.
Files land green, day one.

- Clean files from day one
- Brokers choose you over the competition
- Capacity multiplied

FOR LOAN OFFICERS

Answer borrowers in real time.

- ✓ Income qualified in real time — no waiting on ops
- ✓ Answer borrowers same day, not tomorrow
- ✓ Eligibility and conditions surface before submission
- ✓ Every file arrives complete and ready to review.

FOR BROKERS

Speed that makes them route deals back here.

- ✓ No waiting on AEs to validate a file
- ✓ Instant clarity on what qualifies and what's missing
- ✓ Answers at intake mean loans close faster.
- ✓ Quick turnarounds improve the borrower experience

FOR UNDERWRITERS

Files arrive ready to underwrite, with no document chasing.

- ✓ Every file arrives income-qualified
- ✓ Eligibility pre-evaluated before it hits the desk
- ✓ No back-and-forth chasing missing docs
- ✓ Underwrite with certainty from file one

Broker self-serving bank statement analysis has streamlined how I operate as an AE and improved my relationships with my clients. Brokers don't have to wait on me for bank statements. They already know what's missing or whether a file is ready. They get that clarity up front. I'm no longer an inbox manager.
