

One Platform for All Income Types.

Upload any type of income documents (W2s, pay stubs, tax forms, bank statements, schedule E, etc), analyze income, calculate QI, switch between agencies in one platform.

The first of its kind to be integrated to Fannie Mae Self-employed and Rental income calculators.

The First Platform in the Industry that offers:

- ✓ Integrated Rental Income analysis tied to Fannie Mae guidelines.
- ✓ In-built liquidity analysis that provides additional visibility into the borrower's repayment capacity.
- ✓ Multiple agency-switch without hopping multiple apps.

Prudent AI's Upfront Income platform helps lenders make decisions and not just calculate Income.

Prudent AI,

- ✓ Enables the underlying data and income analysis flow from origination through underwriting to secondary and post-closing.
- ✓ Eliminates Income reinterpretation across Departments.
- ✓ Enables the lenders to re-run scenarios and switch agencies when the borrower's down payment changes, DTI shifts, and loan amount adjusts.
- ✓ Detects and alerts the lenders about missing documents right away.
- ✓ Gives the ability to customize income (Include/Exclude components like bonus, commissions, etc)

How it works

- 1. Upload documents (No upfront selection of income type or product required)
- 2. Prudent AI detects missing documents and alerts lenders
- 3. Immediately calculates QI and displays it on the dashboard
- 4. Then, the lender can choose to switch between agencies & income types (if required)
- 5. With Prudent AI's Integration to Fannie Mae's Income calculator for self-employed and rental income, the product fetches data from borrower's income documents and submits it to Fannie Mae.
- 6. Once the file is submitted, Fannie Mae sends the Reports & Findings to Prudent AI's platform.
- 7. For other agencies and bank statement analysis, QI is calculated along with multiple income breakdown.
